## **2- and 3-port valves with flanged connections, PN 16    VVF43..    VXF43..**

From the large-stroke valve line

- High-performance valves for medium temperatures from -20...220 °C
- Valve body of nodular cast iron EN-GJS-400-18-LT
- DN 65...150
- $k_{vs}$  50...400 m<sup>3</sup>/h
- Flange type 21, flange design B
- VVF43..K with pressure compensation to handle high differential pressure
- Equipable with electro-hydraulic actuators SKC..

### **Use**

---

In boiler, district heating and refrigeration plants, cooling towers, heating groups, and in air handling units as control or shutoff valves.  
For use in closed or open hydraulic circuits (observe cavitation).

<sup>1)</sup> Valve characteristic for  $k_{vs}$  value 63 m<sup>3</sup>/h from 90 % stroke,  $k_{vs}$  value 100, 160, 200 and 250 m<sup>3</sup>/h from 80 % stroke and  $k_{vs}$  value 315 m<sup>3</sup>/h from 70 % stroke is optimized for maximum volumetric flow

<sup>2)</sup> Operate with opposite flow direction with steam

<sup>3)</sup> Reduced  $k_{vs}$  value

DN = Nominal size

$k_{vs}$  = Flow nominal value of cold water (5...30 °C) through the fully opened valve ( $H_{100}$ ) at a differential pressure of 100 kPa (1 bar)

$S_v$  = Rangeability

$\Delta p_s$  = Maximum permissible differential pressure at which the motorized valve still closes securely against the pressure

$\Delta p_{max}$  = Maximum permissible differential pressure across the valve's throughport for the entire positioning range of the motorized valve

### Note

When using a stem heating element with a medium temperature of below -5 °C, the stem sealing gland must be replaced. In this case, the stem sealing gland must be ordered separately (Stock number: 4 284 8806 0).

## Product documentation

- Mounting Instructions M4030 74 319 0749 0
- Basic documentation P4030 Contains background information and technical basic knowledge of valves

## Technical and mechanical design

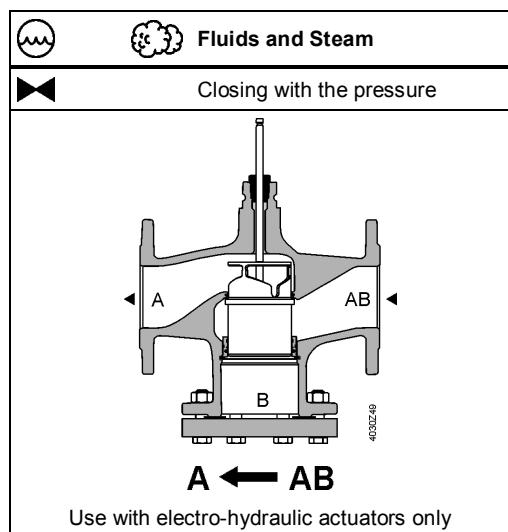

The illustrations below show the basic design of the valves. Constructional features, such as the shape of plugs, may differ.

### 2-port valves

 Fluids	 Steam ( Fluids possible )
 Closing against the pressure	 Closing with the pressure
 <b>A → AB</b> For use with all actuators	 <b>A ← AB</b> Use with electro-hydraulic actuators only

## 2-port valves pressure compensated

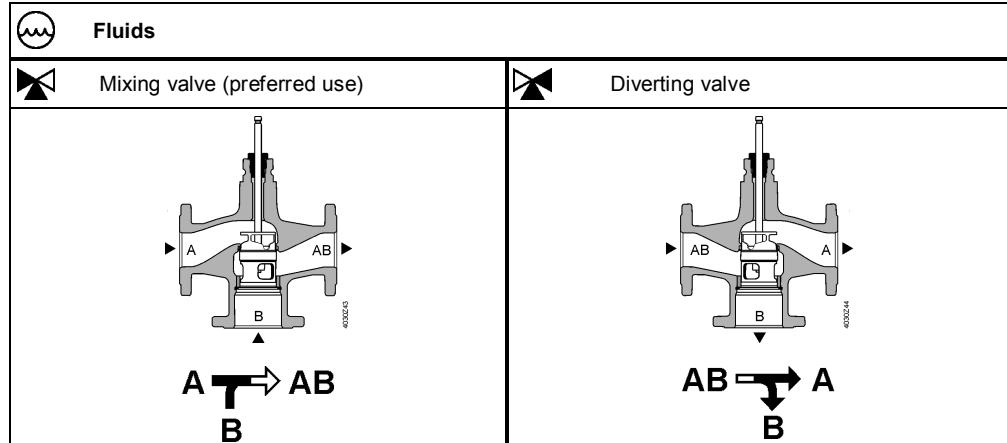

The VVF43..K valves use a pressure-compensated plug. This enables the same type of actuators to be used for the control of volumetric flow at higher differential pressures.

Note

**2-port valves do not become 3-port valves by removing the blank flange!**

## Engineering notes

### Mounting location

Preferably mount the valves at the return, as the temperature is lower there and the strain on the stem sealing gland is lower.

### Dirt trap

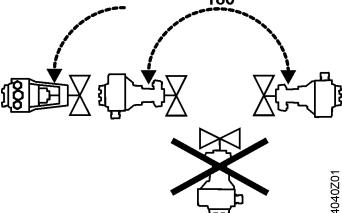

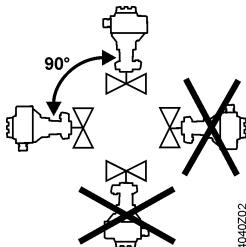

Operate valves of the product lines VVF43.. with inverted flow direction for steam. Mount a dirt filter or dirt trap before the valve to ensure proper functioning, and a long service life of the valve. Remove dirt, welding beads, etc. from the valves and pipes.

### Cavitation

Cavitation can be avoided by limiting the pressure differential across the valve depending on the medium temperature and the prepressure.

## Mounting notes

### Mounting position

	Indoors	Outdoors
	 4040Z01	 4040Z02

Mounting positions apply to both 2- and 3-port valves.

## Commissioning notes

**The valve may be put into operation only if actuator and valve are correctly assembled.**

### Note

Ensure that actuator stem and valve stem are rigidly connected in all positions.

### Function check

Valve	Throughport A→AB	Bypass B→AB
Valve stem extends	Closes	Opens
Valve stem retracts	Opens	Closes

## Maintenance notes

The valves are maintenance-free.

When servicing valves or actuators:

- Deactivate the pump and turn off the power supply
- Close the shutoff valves
- Fully reduce the pressure in the piping system and allow pipes to completely cool down

If necessary, disconnect the electrical wires.

Due to the different types of material used, the valve must be disassembled prior to disposal. Special handling of certain valve components may be required by law or may be sensible from an ecological point of view.

**Local and currently valid legislation must be observed.**

## Warranty

Application-related technical data are guaranteed only when the valves are used in connection with the Siemens actuators listed under "Equipment combinations", page 3.

When used with actuators of other manufacture, any warranty by Siemens becomes void.
