SIEMENS 3076

RDF400.01 RDF600T

# Flush-mounted room thermostats

RDF300... RDF340 RDF400... RDF600...

for 2-pipe, 2-pipe with el. heater and 4-pipe fan coil units for use with compressors in DX type equipment

- RDF300 / RDF400 / RDF600/RDF600T:
   AC 230 V operating voltage, on/off or 3-position control outputs
- RDF340...:AC 24 V, operating voltage, DC 0...10 V control outputs
- · Output for 3-speed or 1-speed fan
- 2 multifunctional inputs for keycard contact, external sensor, etc.
- . Operating modes: Comfort, Economy and Protection
- · Automatic or manual fan speed control
- Automatic or manual heating/cooling changeover
- · Adjustable commissioning and control parameters
- Minimum and maximum setpoint limitation
- User and parameter settings can be retained or restored with power loss

### **Additional features**

- Backlit LCD (RDF300.02, RDF400.01, RDF600, RDF600T)
- Infrared remote control receiver (RDF400.01, RDF600T)
- Auto Timer mode with 8 programmable timers (RDF400.01, RDF600T)

## Type of mounting / suitable conduit boxes

- RDF600... for round CEE box, with min 60 mm diameter, min 40 mm depth
- RDF3... / RDF400... for recessed square box with 60.3 mm fixing centers

### **Applications**

To control the room temperature in individual rooms and zones that are:

- Heated or cooled with 2-pipe fan coil units
- Heated or cooled with 2-pipe fan coil units with electrical heater
- Heated and cooled with 4-pipe fan coil units
- Heated or cooled with compressor in DX type equipment
- Heated or cooled with compressor in DX type equipment with electrical heater
- · Heated and cooled with compressor in DX type equipment

The RDF300... / RDF400... / RDF600... control:

- One 1- or 3-speed fan
- One or 2 on/off valve actuators
- One on/off valve actuator and one 1-stage electrical heater
- One 3-position valve actuator
- One 1-stage compressor in DX type equipment or one 1-stage compressor with electrical heater

### The RDF340... controls:

- One 1- or 3-speed fan
- One or 2 DC 0...10 V valve actuators
- One DC 0...10 V valve actuator and one modulating electrical heater (DC 0...10 V)

### Used in systems with:

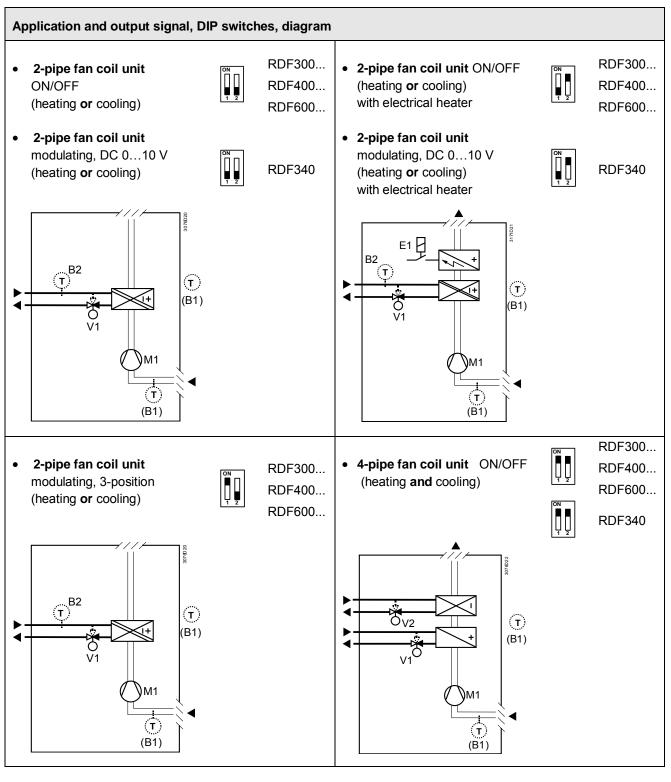

- · Heating or cooling mode
- · Automatic heating/cooling changeover
- Manual heating/cooling changeover
- Heating and cooling mode (e.g. 4-pipe system)

#### **Functions**

- Maintain room temperature via built-in temperature sensor or external room temperature / return air temperature sensor
- · Automatic or manual changeover between heating and cooling mode
- Select applications via DIP switches
- Select operating mode via the operating mode button on the thermostat
- 1- or 3-speed fan control (automatic or manual)
- Display current room temperature or setpoint in °C and/or °F
- Minimum and maximum setpoint limitation
- Key lock (automatic and manual)
- 2 multifunctional inputs, freely selectable for:
  - Operating mode switchover contact (key card)
  - Automatic heating/cooling changeover sensor
  - External room temperature or return air temperature sensor
  - Dewpoint sensor
  - Electrical heater enable
  - Alarm input
- Advanced fan control function, i.e. fan kick, fan start, selectable fan operation (enable, disable or depending on heating or cooling mode)
- Purge function together with 2-port valve in a 2-pipe changeover system
- · Reminder to clean filters
- · Floor heating temperature limit
- · Reload factory settings for commissioning and control parameters
- 7-day time program: 8 programmable timers to switch over between Comfort and Economy mode (RDF400.01 / RDF600T)
- Backlit LCD (RDF300.02 / RDF400.01 / RDF600 / RDF600T)
- Optional infrared remote control (RDF400.01 / RDF600T)

The thermostat supports the following applications, which can be configured by DIP switches on the inner side of the thermostat's front. Depending on the type, on/off or modulating control outputs are available.

## Applications for fan coil systems

V1 Heating or heating/cooling valve actuator

V2 Cooling valve actuator

E1 Electrical heater

M1 3-speed or single-speed fan

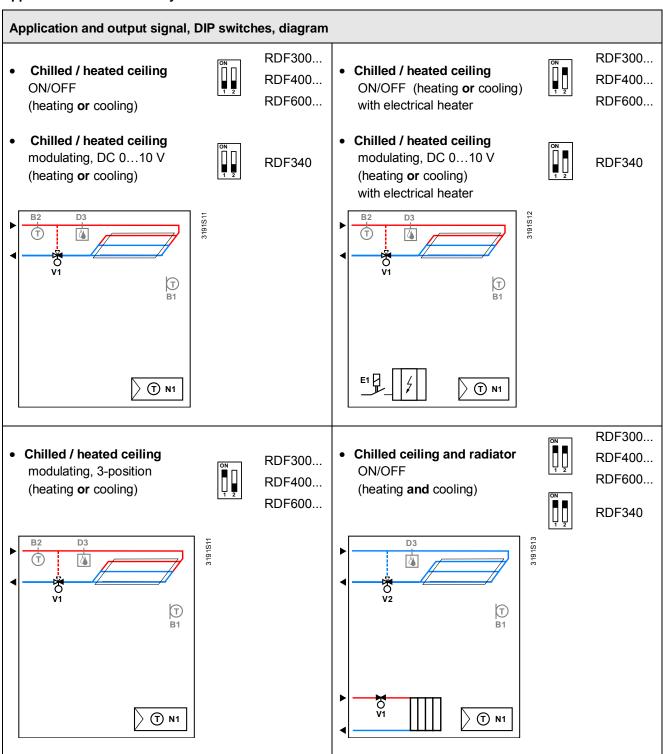

B1 Return air temperature sensor or

external room temperature sensor (optional)

B2 Changeover sensor (optional)

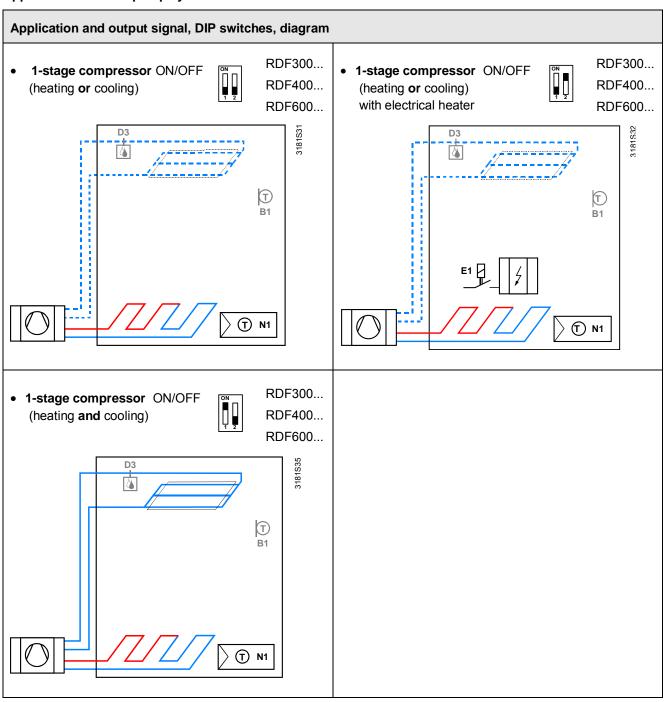

3/14

### **Applications for Universal systems**

- V1 Heating or heating / cooling valve actuator
- V2 Cooling valve actuator
- E1 Electrical heater

- B1 Return air temperature sensor or external room temperature sensor (optional)
- B2 Changeover sensor (optional)
- D3 Dewpoint sensor

- N1 Thermostat
  - Terminal Y10/Y11: Heating (H&C) or Heating/Cooling

Terminal Y20/Y21: Cooling (H&C)

E1 Electrical heater

- B1 Return air temperature sensor or external room temperature sensor (optional)
- D3 Dewpoint sensor

Product	Stock number	Features							
number		Control outputs		am t	ed 1)				
		Operating Voltage	on/off	3pt	DC 010V	Time program	Backlit LCD	Infrared	Suitable conduit box 2)
RDF300	RDF300	AC 230 V	✓	1					square
RDF300.02	RDF300.02	AC 230 V	✓	✓			<b>&gt;</b>		square
RDF400.01	RDF400.01	AC 230 V	✓	1		<b>\</b>	<b>\</b>	>	square
RDF340	RDF340	AC 24 V			✓				square
RDF600	S55770-T291	AC 230 V	✓	✓			<b>✓</b>		round
RDF600T	S55770-T292	AC 230 V	✓	1		<b>✓</b>	✓	<b>✓</b>	round

- 1) Infrared remote control is to be ordered as separate item
- 2) Square conduit box e.g. ARG71.

Round conduit box min 60 mm diameter and min 40 mm depth

# **Ordering**

- When ordering, indicate both product number / SSN number and name: E.g. RDF600 / S55770-T291 room thermostat
- Order the **IRA211 (S55770-T166)** infrared remote control separately (for RDF400../RDF600...).
- Order valve actuators separately.

# **Equipment combinations**

# **Accessories**

Designation	Product no.	Data Sheet
Changeover mounting kit (50 pcs/package)	ARG86.3	N3009
Plastic mounting spacer for flush-mounted thermostats RDF3 RDF400 for increasing the headroom in the conduit box by 10 mm	ARG70.3	N3009
Conduit box for flush-mounted thermostat RDF3 RDF400	ARG71 / S55770-T137	N3009

The thermostat consists of 2 parts:

- Front panel accommodating the electronics, operating elements and built-in room temperature sensor.
- Mounting base with the power electronics.

The rear of the mounting base contains the screw terminals Slide the front panel in the mounting base and snap on.

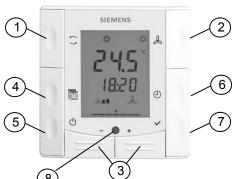

### **Operation and settings**

Auto Timer mode \*

(I) Protection

Mount the room thermostat on the conduit box. Do not mount on a wall in niches or bookshelves, behind curtains, above or near heat sources, or exposed to direct solar radiation. Mount about 1.5 m above the floor.

# Mounting / dismounting

# Wiring

# Devices must be mounted on clean, dry indoor place without direct airflow from a heating / cooling device, and not be exposed to dripping or splashing

- RDF3... / RDF400...: In case of limited space in the conduit box use the mounting bracket ARG70.3 to increase the headroom by 10mm
- Before removing the front cover, disconnect the power supply.

See the mounting instructions enclosed with the thermostat:

M3076... for RDF3..., RDF4... ; M3063 for RDF600... .

 Wiring, protection and earthing must be installed in compliance with local regulations.

### Warning!

# No internal line protection for supply lines to external consumers (Q1, Q2, Q3, Yxx)

Risk of fire and injury due to short-circuits!

- Adapt the line diameters as per local regulations to the rated value of the installed overcurrent protection device.
- Use only valve actuators rated for AC 230 V on RDF300... / RDF400... / RDF600...
- The AC 230 V mains supply line must have an external fuse or circuit breaker with a rated current of no more than 10 A.
- Isolate the cables of SELV inputs X1-M/X2-M if the conduit box carries AC 230 V mains voltage.
- Inputs X1-M or X2-M of different units (e.g. summer/winter switch) may be connected in parallel with an external switch. Consider overall maximum contact sensing current for switch rating.
- · No metal conduits
- No cables provided with a metal sheath
- · Disconnect from supply before opening the cover

### Commissioning

Set the thermostat application via the DIP switches before snapping the front panel on the mounting base.

After power is applied, the thermostat carries out a reset during which all LCD segments flash indicating that the reset was correct. After the reset, which takes about 3 seconds, the thermostat is ready for commissioning by qualified HVAC staff. The control parameters of the thermostat can be set to ensure optimum performance of the entire system (see basic documentation P3076).

Note After powerfail the thermostat restarts in the same mode as before.

#### **Control sequence**

 The control sequence may need to be set via parameter P01 depending on the application. The factory setting for the 2-pipe application is "Cooling only"; and "Heating and Cooling" for the 4-pipe application.

Compressor-based application  $\triangle$ 

 When the thermostat is used with a compressor, the minimum output on-time (parameter P48) and off-time (parameter P49) for Y11/Y21 must be adjusted to avoid damaging the compressor and shortening its life.

Calibrate sensor

 Recalibrate the temperature sensor if the room temperature displayed on the thermostat does not match the room temperature measured (after min. 1 hour of operation). To do this, change parameter P05.

Setpoint and range limitation

We recommend to review the setpoints and setpoint ranges (parameters P08...P12) and change them as needed to achieve maximum comfort and save energy.

### Disposal

The device is considered electrical and electronic equipment for disposal in terms of the applicable European Directive and may not be disposed of as domestic garbage.

- Dispose of the device through channels provided for this purpose.
- Comply with all local and currently applicable laws and regulations.
